

## CLOSING REMARKS

23<sup>rd</sup> International Conference "New Cryogenic and Isotope Technologies for Energy and Environment" – *EnergEn 2021*

On behalf of the ICSI Rm. Vâlcea management and the organizing committee, I am honored to deliver the closing remarks regarding the 23<sup>rd</sup> International Conference "New Cryogenic and Isotope Technologies for Energy and Environment" – *EnergEn 2021*, which due to the COVID-19 pandemic took place virtually.

I would like to express our thanks to all the participants for the success of the event, even if we all felt the lack of warmth of the face-to-face discussions. In these three days we have attended exciting plenary and technical sessions on the 5 topics of the conference that revealed interesting strategic and research elements.

We all had insightful, interactive discussions and a great chance to share the results of our work. Also, we have learned a lot from the technical sessions delivered by the amazing keynote speakers and speakers who have shared their interesting projects and results. Once again, on behalf of the *EnergEn 2021* organizing committee, thank you for delivering such important materials so that all of us can deepen our knowledge about your research findings.

Furthermore, I would like to thank all presenters and participants who have joined this conference from all over the world and allowed us to learn from their valuable experiences. More specifically, we had participants from 12 countries, namely Austria, Canada, China, Czech Republic, Germany, Italy, Romania, Republic of Moldova, Russia, Turkey, United States of America, and United Kingdom. During the conference program, 3 plenary presentations were given, 18 keynote and invited readings and 47 oral communications in the parallel sessions, along with 67 scientific papers in the poster session.

Finally, I would like to thank all, the committee members, sponsors and ICSI colleagues who have contributed their best efforts and assistance in organizing this event and ensuring that it proceeded smoothly. I would also like to apologize for any inconvenience that you might have experienced during this conference.

Ladies and gentlemen, as a Romanian expression says "*Let's see each other well*" I would paraphrase by saying "*Let's see each other well, in person, at the next EnergEn conference*".

Dr. Mihai Varlam  
Chair of the *EnergEn 2021*
